Summary

Software Test Engineer with 2 years & 6 months of experience in manual testing and specialized expertise in healthcare and health insurance applications. Proven skills in IBM Mainframe testing, SDLC/STLC methodologies, and agile environments, demonstrating high proficiency in test case design, execution, and defect management. Adept at working collaboratively within technical teams and supporting impactful projects. Aiming to leverage extensive testing experience to contribute effectively in cross-functional engineering environments.

Skills

Automation, Selenium with Java, Java, C, IBM Mainframe, SDLC/STLC, Manual Testing, Agile Methodology, JIRA, Black Box Testing, System Testing, User Acceptance Testing, MySQL, Functional Testing, Test Case Design and Execution, Smoke Testing, Regression Testing, End-to-End Testing, Defect Tracking and Management, De-bug, Integration Testing, Test Documentation, Team Collaboration, Software Engineering, Computer Science, AI, AI Prompting, Quoting, Verification and validating, Setting up test benches and equipment's

Work Experience

Simplify3x Software Pvt Ltd

Bengaluru, India

Software Test Engineer

Jan 2022 - Jun 2024

- Conducted manual and automation testing for healthcare and health insurance software applications, ensuring high-quality deliverables.
- Utilized IBM Mainframe, SDLC, STLC, and agile methodologies to enhance software development processes.
- Executed black box, system, user acceptance, functional, smoke, and regression testing to guarantee software performance and reliability.
- Managed test documentation and defect tracking meticulously, contributing to smooth project execution.
- Collaborated effectively within cross-functional teams, aligning testing activities with project goals.

Education

KLM College of engineering

Cuddapah, India

B- TECH

Jun 2014 - May 2018

Narayana Jr College

Cuddapah, India

INTERMEDIATE

Jun 2012 - May 2014

Nagarjuna High School

Cuddapah, India

SSC

Mar 2011 - Apr 2012

Projects

EET Migrations E&B - Carelon Global

Jul 2022 - Feb 2023

- Tested and supported batch processes on IBM Mainframe FMDB1 FMDB2
- Conducted manual testing, regression testing, and managed defect lifecycle
- Collaborated closely with the EET team to ensure application stability

THEARPY X / Wound Care - Net Health

Feb 2023 - Jun 2024

- Orchestrated test cases and executed web application testing
- Led end-to-end testing efforts within the team
- Employed agile methodology, JIRA, and comprehensive test documentation practices

Certifications

- Selenium with java
- Lean Six Sigma Yellow belt
- Power BI
- Freedom with AI
